

Module Status Report

Every module audited from the codebase & live production — what's **completed**, where the **gaps** are, and what **needs improvement**. Percentages are engineering estimates, not a formal audit.

Executive Summary — all 25 modules ranked

by completion

Module	Category	Status	Completion	Biggest Single Gap
Quizzes	Core	LIVE	90%	No essay / descriptive auto-grading
Attendance	Core	LIVE	85%	Reports lack analytics / trends
Assignments	Core	LIVE	85%	SQL grading is simulation-only
Leads / CRM	Sales	LIVE	85%	No call transcription / bulk templates
Roles & Permissions	Platform	LIVE	85%	No audit log / data-scoping
Skill Assessment	Assess/AI	LIVE	85%	Paid full-unlock not wired
Courses & Learning	Core	LIVE	80%	No unified content-manager UI
Curriculum & Plan	Core	LIVE	80%	DayView renders video/notes only
Code Assessments	Core	LIVE	80%	Simulation fallback unsafe for grading
Career Profile Builder	Assess/AI	LIVE	80%	No LinkedIn OAuth / PDF export
Platform Settings	Platform	LIVE	80%	No audit log / value validation
Meta Lead Ads	Sales	LIVE	75%	Field mapping hard-coded
Interactive Lessons	Core	BUILDING	75%	No scene branching

MODULE	CATEGORY	STATUS	COMPLETION	BIGGEST SINGLE GAP
AI Mock Interviews	Assess/AI	BUILDING	75%	ElevenLabs / D-ID not deployed
Resume Builder	Assess/AI	BUILDING	75%	No server-side PDF / AI rewrite
Multi-Tenant SaaS	Platform	BUILDING	75%	Plan tiers not enforced
WhatsApp Lead Bot	Sales	BUILDING	70%	Outbound trigger/cron missing — 0 convos
Student Profiles & Reports	Platform	BUILDING	70%	OAuth callbacks + analytics missing
Code Playground	Core	BUILDING	65%	No real debugger / connect UI
CRT / Placement Drives	Placement	BUILDING	65%	No student job board / notifications
Fee Management	Platform	BUILDING	65%	No real payment gateway
Class Recordings	Core	BUILDING	60%	Capture / playback not wired
AI Voice Calls	Sales	BUILDING	60%	No auto-trigger; recording not saved
Placement Partner Outreach	Placement	BUILDING	55%	Email delivery not wired
Marketing & Campaigns	Sales	EARLY	50%	No campaign / automation / analytics

Core Learning (LMS)

9 modules

Courses & Learning

LIVE

80%

✓

COMPLETED

- Full hierarchy CRUD (Course→Subject→Chapter→Topic→SubTopic) with reorder
- Content upload (PDF/Office/images, 50MB)
- Progress tracking + chapter-complete; ConceptLesson upsert

⚠

GAPS

- No standalone course-browse page (only curriculum view)
- Topic/SubTopic/ConceptLesson have no admin UI
- No unified content-manager screen

🔧

IMPROVE

- Move videos from disk to a CDN
- Progress is binary — add time-spent / mastery
- Consolidate scattered admin CRUD into one manager

Codebegun LMS — System Module Overview · Page 2 of 16 · 24 Jun 2026 · Confidential

Curriculum & Learning Plan

LIVE80%

✓ COMPLETED

- DayPlan polymorphic items (content/quiz/assignment/code/interview), slots, gating
- CurriculumBuilder: create/clone/publish/share/import
- MyLearningPlan + DayView; enrollment with preview mode

⚠ GAPS

- Day viewer renders video/notes only — quiz/assignment/interview viewers still stubs
- Weekend-plan editor UI missing
- No drag-drop day reorder

🔧 IMPROVE

- Enforce **enforceSequential** on client navigation
- Factor holidays into the day calendar
- Detect overlapping-enrollment conflicts

Attendance

LIVE85%

✓ COMPLETED

- Mark / view / report; bulk mark + CSV export
- Student & admin views
- Status present/absent/leave + in-out + remarks

⚠ GAPS

- No QR / biometric capture (manual only)
- Reports lack analytics (% trends)

🔧 IMPROVE

- Store in/out as timestamps, not HH:MM strings
- Add device / location verification
- Trend & defaulter dashboards

Quizzes

LIVE

90%

✓ COMPLETED

- Quiz CRUD/clone/archive; question bank + AI-gen + dup-check
- Proctored attempts (cam/mic/fullscreen, tab-switch), negative marking, shuffle, multi-attempt
- Rich reports + CSV; public quiz + leaderboard

⚠ GAPS

- No descriptive/essay auto-grading
- Recordings captured but no playback/review
- Question-analytics UI thin

🔧 IMPROVE

- Surface batch/individual access gating in client
- Cross-attempt plagiarism check
- Public-link expiry

Assignments

LIVE

85%

✓ COMPLETED

- CRUD/clone/publish; types coding/project/MCQ/theory/SQL/file/web
- Submit/run/grade; test cases + rubric; AI-gen
- Reports + CSV import

⚠ GAPS

- SQL grading likely simulation (no live DB exec)
- Plagiarism flag not wired
- File-upload has no virus scan

🔧 IMPROVE

- Enforce late-submission penalty in UI
- Render web (HTML/CSS) instead of markup-grading
- Tighten submission validation

Class Recordings & Live Sessions

BUILDING

60%

✓ COMPLETED

- LiveSession start/list/end; Meeting CRUD
- RecordingLog telemetry
- Bunny video upload (RecordClass)

⚠ GAPS

- Recording capture (Zoom/Bunny webhook) not wired
- No recording access-control / share links
- Client join logic thin

🔧 IMPROVE

- Link meetings to course/batch (currently CRM-lead bound)
- Participant list + invites
- Complete recording-activity schema

Code Assessments

LIVE

80%

✓ COMPLETED

- Snippet model + routes; submit + auto-grade via Piston (real exec in prod)
- Hidden test cases, time/memory limits
- HTML/CSS markup grading; admin + student pages

⚠ GAPS

- Falls back to simulation if Piston URL unset
- No plagiarism detection
- No code linting

🔧 IMPROVE

- Simulation pattern-matches — unsafe for grading; require Piston
- Better compile-error handling
- Per-language linting

Interactive Lessons

BUILDING

75%

✓ COMPLETED

- 7 scene types (story/code-demo/drag-drop/quiz/fill-blank/code-run/summary)
- CRUD + templates + AI-gen; progress + complete
- In-lesson Piston execution; builder + viewer

⚠ GAPS

- No scene branching / conditional flow
- Quiz scenes single-MCQ only
- No XP/rewards tied to enrollment

🔧 IMPROVE

- Model scene media (images/animation) explicitly
- Per-scene "where students struggle" analytics
- Harden sandboxing beyond Piston

Code Playground

BUILDING

65%

✓ COMPLETED

- PlaygroundProgram model; run/list/get/save routes
- Piston execution; GitHub push (Octokit)
- Client editor w/ syntax highlight + run

⚠ GAPS

- Trace/debug endpoint exists but no real step-through debugger
- GitHub needs a token — no connect UI
- No collaboration / versioning

🔧 IMPROVE

- Public snippet share links
- Paginate saved programs
- Better stdin/stdout handling

🎯 Assessment, Career & AI

4 modules

AI Mock Interviews

BUILDING

75%

✓ COMPLETED

- 2 tracks (Manual + AI Virtual); real Claude brain (gen/eval/live conversation)
- Video-call hands-free UI; ElevenLabs + D-ID coded
- Per-attempt AI cost tracking; Bunny recording

⚠ GAPS

- ElevenLabs + D-ID built but **not deployed** (prod = free tier)
- D-ID untested with a real key
- Public free-interview funnel not built

🔧 IMPROVE

- Switch model to Haiku 4.5 → under ₹5/interview
- Deploy + tune premium realism layer
- Meter ElevenLabs/D-ID cost in analytics

Skill Assessment Funnel

LIVE

85%

✓ COMPLETED

- Register→WhatsApp OTP→AI exam→code-verified Qs→adaptive exam→scoring
- AI roadmap + best-fit curriculum; auto LMS account + preview enroll
- CRM sync; admin candidate dashboard

⚠ GAPS

- Paid full-unlock has no endpoint/UI (**unlockCandidatePlans** unused)
- Anti-cheat logged but not enforced
- Mobile exam UX partial

🔧 IMPROVE

- Razorpay self-serve checkout
- Admin question-bank search/filter
- Enforce anti-cheat penalties

Career Profile Builder

LIVE

80%

✓ COMPLETED

- 3 pillars: Resume ATS, GitHub fetch+review, LinkedIn paste review
- Anthropic + OpenAI fallback; per-section regenerate
- Admin review workflow; markdown export

⚠ GAPS

- LinkedIn auto-import (OAuth) absent — paste only
- No PDF export
- No batch admin ops

🔧 IMPROVE

- GitHub connect UI
- Guided "build resume → review" handoff
- Block pillars cleanly when inputs missing

Resume Builder

BUILDING

75%

✓ COMPLETED

- Full sections editor; 4 templates + design customizer
- Upload/parse PDF/DOCX; AI scoring (ATS + breakdown)
- Public share link; print-to-PDF

⚠ GAPS

- No server-side PDF export (browser print only)
- No AI "rewrite this bullet"
- No multi-resume / version UI

🔧 IMPROVE

- Tailor-to-job-description versioning
- ATS auto-remediation
- Tighter Career-Profile integration

Placement (CRT)

2 modules

CRT / Placement Drives

BUILDING

65%

✓ COMPLETED

- PlacementDrive model (company/role/CTC/eligibility/rounds)
- CRUD + status transitions; applicant status tracking
- CSV bulk import; PlacementAnalytics dashboard

⚠ GAPS

- No student notifications on shortlist/select
- No student-facing job board
- No offer-letter generation / interview scheduling

🔧 IMPROVE

- Real-time status push
- Validate CSV imports (batch membership)
- Placement summary / letter PDFs

Placement Partner Outreach

BUILDING

55%

✓ COMPLETED

- Partner model + CSV import + Kanban pipeline
- Outreach sequence (cold/D3/D7); approval queue
- Candidate matching + one-pager PDF; interview/placement recording

⚠ GAPS

- **Email delivery NOT wired** (no SMTP/SES) — messages queue but never send
- Todoist integration scaffold-only; IMAP reply detection missing
- No scheduled-send cron

🔧 IMPROVE

- Template library + variable substitution
- Reply / bounce automation
- Reply-rate & time-to-placement analytics

Sales & Growth (CRM)

5 modules

Leads / CRM

LIVE

85%

✓ COMPLETED

- Full lifecycle (CRUD/stages/convert/audit) — 1,642 leads in prod
- Scoring engine, distribution (round-robin/weighted), dispositions, lost reasons
- Follow-ups, qualification questions, telecaller console, dup-merge, analytics

⚠ GAPS

- Call recordings stored but no transcription
- No bulk SMS/email template system
- Form-config API has no drag-drop builder UI

🔧 IMPROVE

- Surface real-time updates (socket wired, not shown)
- Bulk stage/assign actions; saved views/segments
- Indexed aggregation for analytics at scale

Meta Lead Ads

LIVE

75%

✓ COMPLETED

- Webhook verify + HMAC; intake parses leadgen fields
- Phone normalize/dedupe; auto lead create; manual sync (306 synced)
- Triggers scoring / AI-call / drip

⚠ GAPS

- Field mapping hard-coded (no UI)
- Dedup not enforced at create; no 429 backoff
- No cost-per-lead dashboard; no retry/DLQ

🔧 IMPROVE

- Structured error tracking
- Webhook-health metrics
- Signature test vectors

WhatsApp Lead Bot

BUILDING

70%

✓ COMPLETED

- Webhook verify; inbound parser (text/button/list)
- Qualification state machine + persistent state + scoring
- Manual + bulk-cold send; drip service (D1/D3/D7) coded

⚠ GAPS

- **No outbound auto-trigger** on new lead
- Drip cron never scheduled (processDueMessages uncalled) → **0 conversations in prod**
- No template variables

🔧 IMPROVE

- Add trigger on lead-create + hourly drip cron
- Template {{name}}/{{course}} substitution
- Qualified-rate analytics; conversation branching

AI Voice Calls

BUILDING

60%

✓ COMPLETED

- AICallConfig (questions/retries/working-hours/scoring)
- Exotel dial + BullMQ queue/worker (working-hours aware)
- Webhook → transcript → LLM scoring; WhatsApp fallback; manual trigger

⚠ GAPS

- No auto-trigger on hot lead (manual only)
- Q&A extraction holistic, not structured
- Recording URL not saved; no DND/consent

🔧 IMPROVE

- Auto-trigger on lead-create
- Inject lead context into the LLM prompt
- Persist recording + cost; circuit-breaker on concurrency

Marketing & Campaigns

EARLY

50%

✓ COMPLETED

- Google Ads webhook intake
- Google Sheets one-way write-back
- LeadSourceConfig (encrypted creds); LeadSources breakdown page

⚠ GAPS

- No campaign / email-SMS template system; no automation triggers
- No ROAS / attribution dashboard; UTM not correlated to conversion
- Sheets sync one-way only

🔧 IMPROVE

- Multi-touch attribution
- Credential rotation/refresh
- A/B variant tracking; webhook rate-limit

🔧 Platform & Administration

5 modules

Multi-Tenant SaaS

BUILDING

75%

✓ COMPLETED

- Tenant model (plan/type/subscription); CRUD + invite links
- 11+ module gates + 13 student feature flags; fail-closed gating
- Per-tenant receipt branding; college fields

⚠ GAPS

- Plan tiers stored but **not enforced** (no entitlements/metering)
- No tenant-admin self-service tier
- Per-student override absent; white-label partial

🔧 IMPROVE

- Usage metering + plan enforcement
- Vanity-domain invite links
- Bulk tenant ops / health checks

Roles & Permissions (RBAC)

LIVE

85%

✓ COMPLETED

- 6 base roles + 60+ granular perms across 13 groups
- Custom tenant roles (union merge); guards on sensitive routes
- getAvailablePermissions API for UI

⚠ GAPS

- No permission audit log; no role templates
- No data-scoping (e.g. instructor → own students only)
- Custom roles can only add, never restrict

🔧 IMPROVE

- Move PERMISSION_GROUPS to DB (dynamic registry)
- Permission inheritance patterns
- Polish the UI role builder

Fee Management

BUILDING

65%

✓ COMPLETED

- Fee model + components; multi-method payments + txn id; installments
- Branded receipts + student self-serve; analytics
- Bulk reminders; seat reservations

⚠ GAPS

- **No real payment gateway** (Razorpay/Stripe) — manual txn entry
- No payment webhooks; no refund endpoint
- Demo-period fields set but not enforced

🔧 IMPROVE

- Extract 41KB receipt HTML into a template service
- Auto-generate installment plans + validate amounts
- Enforce reservation status flow

Platform Settings

LIVE

80%

✓ **COMPLETED**

- 108 config keys in 8 groups; AES-256 secret encryption
- 3-level resolution (tenant→UI→env) + mirror-to-env at boot
- Source tracking + masking; Anthropic/OpenAI/email test endpoints

⚠ **GAPS**

- No audit log / rollback / history
- No bulk import-export
- ENCRYPTION_KEY can't be rotated via UI

🔧 **IMPROVE**

- SETTING_DEFS hard-coded — needs deploy to add keys
- Value validation (ports, prices, ranges)
- Non-blocking boot load

Student Profiles & Reports

BUILDING

70%

✓ **COMPLETED**

- Report service aggregates 7 dimensions (attendance/quizzes/assignments/fees/interviews/exams)
- Student dashboard (stats, today's plan, deadlines); multi-step profile
- Self-serve receipt; profile-complete flag

⚠ **GAPS**

- OAuth (LinkedIn/GitHub) fields exist but no callback handlers
- No per-course mastery %; no engagement heatmaps
- No predictive / dropout-risk analytics

🔧 **IMPROVE**

- Export report (CSV / PDF)
- Server-side profile-completion + progress
- Consolidate dashboard data into one service

■ **Flagship End-to-End Flow — Skill Assessment**

Candidate journey — built end-to-end (one GAP at the unlock step)

1

✓

Register

Name, target role, stack & experience.

2

✓

WhatsApp OTP

Phone verified (6-digit, 10-min TTL).

3

✓

AI Blueprint

Claude designs a personalised exam.

4

✓

Question Gen

AI writes items; verified on Piston.

5

Adaptive Exam

MCQ, debug, predict, live code, SQL.

6

Scoring

Readiness Score + percentile.

7

AI Roadmap

Best-fit curriculum + gaps + salary band.

8

Account + Enroll

Auto LMS account, creds via WhatsApp, CRM sync.

9 • GAP

Full Unlock

Preview only (2 days). Paid unlock has no UI/endpoint.

■ 📅 Dated Roadmap — path to 100%

Target windows assume two-week sprints starting today. **Owner column is a placeholder** — assign your team. Sprint 1 is highest priority: these features are built but inert.

SPRINT	WORKSTREAM	DELIVERABLE	OWNER
SPRINT 1 • UNBLOCK REVENUE — 24 JUN → 7 JUL			
S1	WhatsApp Bot	Outbound auto-trigger on lead-create + scheduled drip cron (fixes 0 conversations)	—
S1	AI Voice Calls	Auto-trigger on hot leads (replace manual-only)	—
S1	Skill Assessment	Paid full-unlock endpoint + admin UI (wire unlockCandidatePlans)	—
SPRINT 2 • PAYMENTS & OUTREACH — 8 JUL → 21 JUL			
S2	Placement Partner	Real email delivery (SES/SendGrid) + scheduled-send cron	—
S2	Fee Management	Razorpay gateway + payment webhooks for self-serve	—
S2	AI Interviews	Switch model to Haiku 4.5 → under ₹5 / interview	—
SPRINT 3 • COMPLETE THE UX — 22 JUL → 4 AUG			
S3	Curriculum	Finish DayView: render quiz / assignment / interview inline	—
S3	AI Interviews	Deploy + live-test ElevenLabs + D-ID realism	—
S3	Career / Resume	Server-side PDF export + AI "rewrite bullet"	—
S3	Class Recordings	Wire capture + access-controlled playback	—
SPRINT 4 • HARDEN & SCALE — 5 AUG → 18 AUG			
S4	Platform	Plan-tier metering + settings / permission audit logs	—
S4	Assessments	Enforce anti-cheat + plagiarism (quiz / assignment / code)	—
S4	Reports	Unified analytics dashboard + CSV / PDF export	—
S4	Growth	Public assessment & interview funnels; marketing attribution	—

Status: ■ Live — deployed & operational (≥80%) ■ Building — works partially, real gaps (55–79%)

⚠️ **Production reality check (verified 24 Jun 2026):** Claude key is live → AI interviews + assessments run real AI on the free voice/avatar tier. ElevenLabs + D-ID are coded but **not deployed**. The WhatsApp bot has live Cloud-API credentials but has **never sent an outbound message** (0 conversations) — its inbound machine works, the outbound trigger/cron is the missing piece. Placement-partner outreach queues emails but has **no SMTP wired**. Fee payments are manual (no gateway).

Codebegun LMS — Module Status Report · 24 Jun 2026.

Percentages are engineering estimates from the codebase, project notes and verified production state — not a formal audit. "Live" = deployed & operational; "Building"/"Early" = code exists but the feature is incomplete or inert.
